Date: Nov 7th & 8th

Time: 8am to 4:30pm

Hosted by: Rowdy Brixey

Location: Middleby Bakery Group
Bakery Innovation Center
808 Stewart Ave
Plano, TX 75074

Visit www.Brixey-Eng.com for more information about the class, booking information, hotels, & future classes.

Objective	To provide attendees with new ideas and strategies that can lower the cost of maintenance and predict unplanned events. Discuss industry leading ideas for finding and developing tomorrow's mechanic.
Benefits	<ol style="list-style-type: none">1. Achieve lowest maintenance cost through ordering parts and scheduling work using condition-based data versus time-based repetitive equipment inspections.2. Become <i>proactive</i> rather than <i>reactive</i> in carrying out maintenance activities.3. Build a sustainable pipeline for future maintenance talent.4. Ensure talent development through a pay-for-skill model that works.5. Learn a new local sourcing model for future talent.6. Set plants up for a successful future TPM deployment.
Who Should Attend	Plant Managers, Operation Managers, Maintenance Managers, Plant Engineers, and Executive Leadership looking to develop, implement, or improve the reliability and reduce the overall cost of maintenance.
